

AirLift!

Participants will learn:

- to define the problem facing them
- to split the overall job into sub-problems and delegate appropriately
- to coordinate all aspects of the task towards a clear objective
- to maximise use of resources
- to use teamwork skills to maximise overall performance

- 🕒 1 hour + debrief
- 👥 3-24 (up to four teams of 3-6 per team)
- ❓ Staff at any level
- £ £395 ex vat
- PC Optional

■ Teams coordinate an emergency rescue. Guaranteed to be a great hit with delegates - and in 60 minutes you'll have a clear idea of their problem-solving techniques and team organisation skills.

AirLift is all about coordinating a series of mini-problems in order to achieve the overall objective.

A remote, disaster-struck area needs your urgent help. You arrange an air-drop of emergency supplies - tents, blankets, food, medicines (represented by coloured blocks) to eight separate villages. Fuel is limited so what's the most economic route? Eight crates are constructed, packed with supplies specific to each village and labelled. Next is to load the crates into the cargo hold. It's jam-packed but everything goes in, just! Let's hope you planned it so that the first crate dropped matches the village below. There's no spare fuel for re-routing the flight!

Having solved all aspects of this tough problem, teams fill in their pilot's log detailing their route. They can then demonstrate that each and every village gets the right set of supplies.

All possible routes are clearly listed in the Trainer's notes (or you can use the optional software to do it for you).

Airlift!

Trainer's Role

- 1 Divide the participants into teams.
- 2 Introduce the activity using the PowerPoint presentation.
- 3 Issue the Team Briefs and other materials and allow teams 60 minutes to work on the task.
- 4 Collect in the Pilot's Log from each team and issue short questionnaires for teams to review how they worked.
- 5 Lead a discussion on how teams tackled the problem and then issue the results followed by a Debrief on the key points and how the lessons can be transferred to the workplace.

Full details provided in the Trainer's Notes.

Testimonials

Malcolm Archer,
Training Department, BAE Systems
We used Airlift! as an exercise during a teambuilding course with engineers of mixed age and experience. The best learning points were to listen to the contribution of others; plan and assign roles.

A good teambuilding activity that can be used in most environments (assuming access to a PC!)

Derek Harrowell, Training Manager,
Buckinghamshire Hospital NHS Trust
Used in a first line workshop with new managers, it provided an ideal exercise for reinforcing the messages of planning, time management and problem-solving.

Great general exercise for reinforcing learning; very practical and hands on.

Pack Contents

- Trainer's Notes
- Computer Program (optional) and PowerPoint Presentation
- Team Briefs
- Cargo Holds
- Pilot's Log Sheets
- Wooden Blocks
- Card, Scissors, Rulers, Sticky Tape
